

# TAURUS

Taurus Security System™

## AN INTEGRAL PART OF YOUR HANDGUN

*The Taurus Security System™ renders the firearm inoperable by use of a special key. For those with concerns about unauthorized use of their Taurus firearm, the integral Taurus Security System™ provides an additional measure of assurance. All Taurus firearms include either the Taurus Security System or an appropriate trigger locking mechanism as shown below.*

## TAURUS SECURITY SYSTEM™ FOR REVOLVERS

### ENGAGEMENT (Secure)

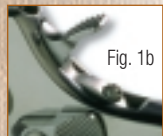

Fig. 1b

Insert the key into the mechanism and turn clockwise until a click is felt or heard (Fig. 1a). The mechanism now partially protrudes above the surface of the back of the hammer (Fig. 1b). The action is locked in place and cannot function.

Fig. 1a

### DISENGAGEMENT (Ready-to-Fire)

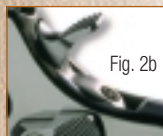

Fig. 2b

To place the revolver in a firing condition, insert the key into the mechanism and turn it counter-clockwise (Fig. 2a). The mechanism is now virtually flush with the back portion of the hammer (Fig. 2b). The revolver can now be fired.

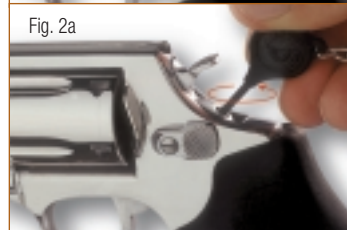

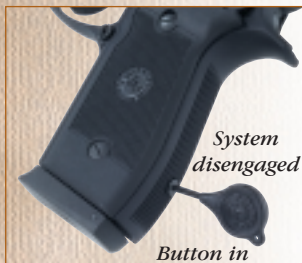

Fig. 2a

## TAURUS SECURITY SYSTEM™ FOR MILLENNIUM FAMILY

The Taurus Millennium™ family of auto pistols will soon feature the Taurus Security System™, which provides instant-ready defense with built-in ability to secure your pistol and make it inoperable at the turn of a key. When the Security System is engaged, the Millennium cannot be fired, cocked, or disassembled, and the gun's manual safety cannot be disengaged. As with our revolver Security System, the device is part of the firearm and cannot be lost, and the same special Security Key works for both the revolver and pistol systems (two keys come with each gun).

## TAURUS SECURITY SYSTEM™ FOR PISTOLS

This innovative and patented system has been introduced to the complete line of Taurus compact and large frame pistols. Just like the revolver version, a quarter turn of the key locks the action, preventing the hammer and trigger from moving, and prohibits racking of the slide. Just a quarter turn of the key returns the gun to complete readiness. The Taurus Security System is always included at no additional cost.

While many Taurus firearms contain the Taurus Security System, we are aware that owners of our earlier models also have a requirement for securing their handguns. Taurus will provide our patented trigger blocking device to any owner of a Taurus Handgun at no charge other than \$7.95 for postage and handling. Make a copy of this coupon and send it in to get your trigger block. Be sure to let us know the model number of your gun so we can send you the proper block. Firearms safety and proper storage of your gun is your responsibility.

FREE trigger blocks when you pay shipping and handling!

### LOADED CHAMBER INDICATOR ON TAURUS PISTOLS

Safety first is the motto of every law-abiding gun owner. With that in mind, Taurus provides a loaded chamber indicator on all new compact, medium and large frame pistols. As with all Taurus safety and security innovations, the indicator in no way interferes with the operation of your pistol and is provided at no extra cost, but gives you an "at-a-glance" verification that there is a round in the chamber. When a round is in the chamber, the ejector pops out of the slide, exposing a red strip just behind the ejection port. While any loaded chamber indicator is no substitute for common sense and safe firearm handling, it is one more example of Taurus' commitment to outstanding firearms.

### 3-POSITION SAFETY IS A TAURUS INNOVATION.

Fig. 1

Try the ambidextrous Three-Position Safety on any Taurus pistol capable of firing in both single action and double action. It's easily operated and provided at no additional charge. Depress with your thumb (Fig. 1) and safely drop the hammer to de-cock the pistol. The safety returns to the OFF position, ready for double action shooting. Push the safety up (Fig. 2) and your cocked pistol is safe to carry in the single action mode. When applied to a de-cocked pistol, safety is ON and the first shot is double action.
